PROFESSIONAL SUMMARY

IT trainer and UX/UI designer who turns complex design tools and workflows into training material people can actually learn from, now extending that structured thinking into data analytics to back design decisions with real numbers. Looking for opportunities in UX/UI design, data analytics, or technical training where design intuition and data can work together.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL, JavaScript

Frontend / Backend: HTML, CSS, Bootstrap, Spring Boot, Django

Data Analytics & Libraries: Power BI, Tableau, Google Big Query, Databricks, Excel, Power Query, Pandas

Database: MySQL, PostgreSQL, SQL Server

Tools & AI: Git, GitHub, VS Code, Generative AI, Google Stitch, AWS

Design: : Figma, UX Research, UI Design, Prototyping

EDUCATION

MCA — Master of Computer Application

July 2023 – July 2025

Jabalpur Engineering college, Jabalpur (Madhya Pradesh)

CGPA: 7.6 / 10.0

- Relevant Coursework: DBMS, Machine Learning, OS, Computer Networks, Software Engineering, Cloud Computing

BSC — Bachelors of Science (CS)

June 2019 – June 2022

Raja Shankar shah university, Chhindwara (Madhya Pradesh)

CGPA: 69.3/ 10.0

- Relevant Coursework: Foundation in programming, web technology and mathematics.

EXPERIENCE

IT Technical Trainer - EduCADD Learning Solutions Pvt. Ltd.

Nov 2025 – June 2026

Bengaluru, Karnataka, India

Python · basic Computer · Java · data analytics

- Delivered hands-on training in Java Full Stack, Python, Web Development, and UX/UI Design, emphasizing learner-centered instruction and real-world application
- Integrated outcome-based learning by incorporating live coding sessions, real-time projects, and problem-solving exercises into the curriculum.
- Taught Core and Advanced Java, Full Stack Development (HTML, CSS, Bootstrap, JavaScript, MySQL), and UX/UI design principles to undergraduate and postgraduate students

PROJECTS

Cloud Sales Analytics Dashboard

github.com/codeByNeha/cloud-Analysis

Power BI · Google Big Query · SQL · DAX

- Connected Power BI to a Google Big Query data warehouse via secure service-account authentication.
- Cleaned and transformed raw sales data in Power Query; built a relational data model with DAX measures for revenue, growth %, and running totals
- Designed an interactive dashboard with slicers and drill-down filters; published via Power BI Service for stakeholder access

COVID-19 Data Analysis

github.com/codeByNeha/covid-Analysis

SQL Server · Tableau · Excel

- Analysed COVID-19 cases, deaths, population, and infection trends across countries and continents using **SQL Server**
- Developed an interactive **Tableau dashboard** with country filters, time-series visualizations, and continent-level comparisons.
- Analysed infection trends from **2020–2026** and implemented **Tableau forecasting through 2028** to visualize potential future trends.

My Personal Portfolio

github.com/codeByNeha/Portfolio

Reactjs, Tailwind CSS, Typescript, Vite, Framer Motion

- Designed and built a personal portfolio site from scratch (no template) to showcase training, design, and analytics work
- Fully responsive layout with a centralized content system for easy updates
